REGISTER NOW!

The registration is possible exclusively online. You can find the link to the registration form at www.bukopharma.de/de/antibiotika. Your registration will be confirmed in writing.

PARTICIPATION FEE

The conference is taking place as a hybrid meeting. It will be recorded live in the Kultur- und Kommunikationszentrum KuKS in Bielefeld and transmitted. The online participation via Zoom is free of cost. However, we are pleased to receive a birthday donation! If the occurrence of infection permits, a participation on site (for a limited number of guests) is also possible. Please indicate when you register how you want to take part. The participation fee including the meals amounts to 20 € for one day and 40 € for both days for low earners and students respectively. Average earners pay 35 € and 70 € respectively.

PARTICIPATION VIA ZOOM

The link that is necessary for access to the conference will be sent to all registered participants. You can use Zoom in the browser Chrome or Firefox and open the link in the browser as usual. Then the instructions follow. You will be asked to install the program or to open the Meeting in the Web. Subsequently specify your name for the meeting and click on the field „Enter“.

Since 40 years the BUKO Pharma-Kampagne is committed to Global Health, rational use of medical drugs and an equitable access to medicines worldwide. We want to celebrate this milestone birthday with a two-day expert conference.

The title of the conference, „One World – One Health“ is describing our guiding principles during four decades of campaign work. To think health holistically and globally is our hallmark. At the same time, the One Health approach is pathbreaking in the control of antibiotic resistances. The contribution of our expert conference starts herewith. It is divided into an international and a national part.

Part 1: International debate

Together with our project partners from India, South Africa, Tanzania and Germany we provide insights into the problems of resistance in the field of humans, animals and the environment in the first part of the conference. We guide you through our new exhibition „Not to be stopped“, derive goals and political claims out of the existing problems and discuss with decision makers from North-Rhine Westphalia (NRW).

With the friendly assistance of

Part 2: National debate

In the second part of our conference we focus on Germany. Experts identify hotspots of resistance development and present potential solutions. Together with stakeholders and representatives of NGOs from the fields of health, agriculture, and environment we want to develop political strategies and make plans.

Supported by Engagement Global with funds from the

One World – One Health Antibiotic resistance as a global health problem

Conference on the occasion of the
40th anniversary of the
BUKO Pharma-Kampagne

April 30, 2021 - May 1, 2021
